# Introduction

This directory presents a selection of resources produced by groups funded by two grants programmes: Connecting Communities Plus, Community Grants; the Faith Communities Capacity Building Fund; or both. The resources listed demonstrate some of the outcomes of successful faith, community and voluntary sector projects. Some are specifically faith-based; others are generic.

The grants were awarded to the organisations between 2006 and 2008. The grant awarding programmes were sponsored by Communities and Local Government, the government department working on cohesion issues in England. The Faith Communities Capacity Building Fund supported inter faith work and helped to build the capacity of recipient faith-based organisations and groups in England and Wales. Connecting Communities Plus, Community Grants supported race equality and community cohesion work in local communities across England.

If you are interested in any of these resources, please contact the relevant organisation directly. Please note that there still may be a charge for a resource even where this has not been specified.

Behind these resources are stories of empowerment and success which show what can be achieved and developed locally. These resources also show the inspiration and commitment in the work of each project. We hope they will inspire you in your own work. CDF takes no responsibility for the content of these resources. The descriptions are those produced by the groups themselves.
